XC936 Wheel Loader — 3 t of Reliable Loading Capacity

92 kW	10,300 kg	1.8–2.1 m³	—
RATED POWER	OPERATING WEIGHT	BUCKET CAPACITY	DIG DEPTH / DUMP HEIGHT

Overview

The XC936 is the right size when a 5-tonne loader is too big and a skid steer is too small. Its 3,000 kg rated load, 10,300 kg operating weight and 1.8–2.1 m³ bucket let one operator load trucks, move stockpiles and clean yards efficiently, while the 92 kW Weichai engine and torque-converter transmission keep the machine simple to run and easy to maintain in markets where fuel quality and parts access vary. ---

Key features

Weichai turbocharged engine — 92 kW, mechanically governed for reliability and easy field service, with a three-stage air filter for dusty yards.

Matched drivetrain — torque converter and power-shift transmission with a reinforced drive axle, designed for repeated loading cycles rather than occasional use.

Hydraulic system built for speed — large-displacement pump and priority steering circuit give fast bucket lift and responsive, light steering.

Compact 3 t package — 10,300 kg operating weight and a short wheelbase make it manoeuvrable in tight yards and easy to transport.

Comfortable cab — spacious operator station, wide glass area and low noise; all daily service points reachable from ground level.

Bucket and attachment range — 1.8–2.1 m³ general-purpose buckets plus optional forks, clamps and snow blades for year-round utilisation.

--

Applications

- Sand, gravel and aggregate yards
- Ready-mix and concrete plants
- Construction site material handling
- Agricultural and livestock operations
- Municipal yards, waste and snow clearing
- Rental fleets and dealer rental programmes
- --

Technical specifications

Parameter	Unit	XC936 Wheel Loader
Rated load	kg	**3,000**
Bucket capacity	m^3	**1.8–2.1**
Rated power	kW	**92**
Operating weight	kg	**10,300**
Engine	—	**Weichai turbocharged, China II**
Transmission	—	**Power shift, 4 forward / 2 reverse**
Drive	—	**4WD, reinforced drive axles**
Steering	—	**Load-sensing full hydraulic, articulated**
Tyres	—	**17.5-25**
Bucket control	—	**Mechanical joystick (pilot optional)**

Standard: Weichai 92 kW engine, 1.8 m^3 general-purpose bucket, 17.5-25 tyres, ROPS/FOPS cab, power-shift transmission, hydraulic steering, working lights.

Optional: 2.1 m^3 bucket, pallet forks, log/grass clamp, quick coupler, pilot hydraulic control, air conditioning, reversing camera, snow blade, wider tyres. ---
